By Henri Cohen : Number Theory: Volume I: Tools and Diophantine Equations (Graduate Texts in Mathematics) graduate texts in mathematics gtm issn 0072 5285 is a series of graduate level textbooks in mathematics published by springer verlag the books in this series serge lang french ; may 19 1927 september 12 2005 was a french born american mathematician and activist he is known for his work in number theory Number Theory: Volume I: Tools and Diophantine Equations (Graduate Texts in Mathematics):

The central theme of this book is the solution of Diophantine equations i e equations or systems of polynomial equations which must be solved in integers rational numbers or more generally in algebraic numbers This theme in particular is the central motivation for the modern theory of arithmetic algebraic geometry In this text this is considered through three of its most basic aspects The book contains more than 350 exercises and the text is largely self con From the reviews lquo The book under review deals with Diophantine analysis from a number theoretic point of view hellip Each chapter ends with exercises ranging from simple to quite challenging problems The clarity of the exposition is the one we exp
