By John Conway, Neil J. A. Sloane : Sphere Packings, Lattices and Groups (Grundlehren der mathematischen Wissenschaften) (v. 290)

sphere packings lattices and groups grundlehren der mathematischen wissenschaften v 290 by conway john; sloane neil j book information and reviews for isbn9780387985855sphere packings lattices and groups grundlehren der mathematischen wissenschaften v 290 Sphere Packings, Lattices and Groups (Grundlehren der mathematischen Wissenschaften) (v. 290):

2 of 2 review helpful Good content bad quality By permutohedron Great collection of interesting work but the quality of this editon is awful Mine came with multiple cracks in the binding and the print doesn t look great either 0 of 4 review helpful What i wanted By OldFish Would not have bought it it I did not want it 21 of 24 review helpful The third edition of this definitive and popular book continues to pursue the question what is the most efficient way to pack a large number of equal spheres in n dimensional Euclidean space The authors also examine such related issues as the kissing number problem the covering problem the quantizing problem and the classification of lattices and quadratic forms There is also a description of the applications of these questions to other areas of mathematics and sci Third Edition J H Conway and N J A Sloane Sphere Packings Lattices and Groups This is the third edition of this reference work in the literature on sphere packings and related subjects In addition to the content of the preceding editions
