By W. Klingenberg : A Course in Differential Geometry (Graduate Texts in Mathematics) bs candidates are further required to select a minor field which consists of three additional courses that are outside the department of

mathematics and either are compendium of all course descriptions for courses available at reynolds community college
A Course in Differential Geometry (Graduate Texts in Mathematics):

This English edition could serve as a text for a first year graduate course on differential geometry as did for a long time the Chicago Notes of Chern mentioned in the Preface to the German Edition Suitable references for ordinary differential equations are Hurewicz W Lectures on ordinary differential equations MIT Press Cambridge Mass 1958 and for the topology of surfaces Massey Algebraic Topology Springer Verlag New York 1977 Upon David Hoffman
