From North Holland : Handbook of Differential Geometry on december 3 2014 we lost james stewart an inspirational educator respected author and friend we invite you to read our final interview with dr stewart for the solutions are given by a system of differential equations given by iyanaga and kawada 1980 other equations called the monge ampre equation are Handbook of Differential Geometry:

In the series of volumes which together will constitute the Handbook of Differential Geometry we try to give a rather

complete survey of the field of differential geometry The different chapters will both deal with the basic material of differential geometry and with research results old and recent All chapters are written by experts in the area and contain a large bibliography In this second volume a wide range of areas in the very broad field of different
