From Karsten Grove : Comparison Geometry (Mathematical Sciences Research Institute Publications)
established in 2002 by the us department of educations institute of education sciences to provide educators

policymakers researchers and the public with a 2004 research publications 2004 research publications are listed alphabetically by section name below please note that copies of these publications are not held Comparison Geometry (Mathematical Sciences Research Institute Publications):

This book documents the recent focus on a branch of Riemannian geometry called Comparison Geometry The simple idea of comparing the geometry of an arbitrary Riemannian manifold with the geometries of constant curvature spaces has seen a tremendous evolution recently This volume is an up to date reflection of the recent development regarding spaces with lower or two sided curvature bounds The content reflects some of the most exciting activities in comparison geometr of the hardback a beautiful comprehensive and up to date collection of expository experts in the field European Mathematical Society
