By Daniel A. Klain, Gian-Carlo Rota : Introduction to Geometric Probability (Lezioni Lincee) Introduction to Geometric Probability (Lezioni Lincee):

Here is the first modern introduction to geometric probability also known as integral geometry presented at an elementary level requiring little more than first year graduate mathematics Klein and Rota present the theory of intrinsic volumes due to Hadwiger McMullen Santal and others along with a complete and elementary proof of Hadwiger's characterization theorem of invariant measures in Euclidean n space They develop the theory of the Euler characteristic
