stylesheet for use when a translation requires any css style changes this stylesheet can be used directly by languages such as chinese japanese and korean resources for physics students and teachers deadly eei ideas ideas for year 11 and 12 physics extended experimental investigations The Motion of a Surface by Its Mean Curvature. (MN-20) (Mathematical Notes):

Kenneth Brakke studies in general dimensions a dynamic system of surfaces of no inertial mass driven by the force of surface tension and opposed by a frictional force proportional to velocity He formulates his study in terms of varifold surfaces and uses the methods of geometric measure theory to develop a mathematical description of the motion of a surface by its mean curvature This mathematical description encompasses among other subtleties those of changing geo
