By Peter B. Gilkey, John V Leahy, JeongHyeong Park : Spectral Geometry, Riemannian Submersions, and the Gromov-Lawson Conjecture (Studies in Advanced Mathematics)

Spectral Geometry, Riemannian Submersions, and the Gromov-Lawson Conjecture (Studies in Advanced Mathematics):

This cutting edge standard setting text explores the spectral geometry of Riemannian submersions Working for the most part with the form valued Laplacian in the class of smooth compact manifolds without boundary the authors study the relationship if any between the spectrum of D_p on Y and D_p on Z given that D_p is the p form valued Laplacian and $\pi: Z \rightarrow Y$ is a Riemannian submersion After providing the necessary background including basic differential geo
