**By Jean-Luc Brylinski, Ranee Brylinski, Victor Nistor : Advances in Geometry** geometry from the ancient greek ; geo quot;earthquot; metron quot;measurementquot; is a branch of mathematics concerned with questions of shape size relative early geometry the earliest recorded beginnings of geometry can be traced to early peoples who

discovered obtuse triangles in the ancient indus valley see harappan Advances in Geometry:

This book is an outgrowth of the activities of the Center for Geometry and Mathematical Physics CGMP at Penn State from 1996 to 1998 The Center was created in the Mathematics Department at Penn State in the fall of 1996 for the purpose of promoting and supporting the activities of researchers and students in and around geometry and physics at the university The CGMP brings many visitors to Penn State and has ties with other research groups it organizes weekly semina
