By Cristian E. Gutierrez : The Monge-Ampère Equation (Progress in Nonlinear Differential Equations and Their Applications) this paper considers the problem of designing maximum distance separable mds codes over small fields with constraints on the support of their generator matrices retrouvez toutes les discothque marseille et se retrouver dans les plus grandes soires en discothque marseille The Monge-Ampère Equation (Progress in Nonlinear Differential Equations and Their Applications):

The Monge-Ampère equation has attracted considerable interest in recent years because of its important role in several areas of applied mathematics Monge-Ampère type equations have applications in the areas of differential geometry the calculus of variations and several optimization problems such as the Monge-Kantorovitch mass transfer problem This book stresses the geometric aspects of this beautiful theory using techniques from harmonic analysis
