By V.I. Arnold, S.M. Gusein-Zade, Alexander N. Varchenko : Singularities of Differentiable Maps, Volume 1: Classification of Critical Points, Caustics and Wave Fronts (Modern Birkhäuser Classics) Singularities of Differentiable Maps, Volume 1: Classification of Critical Points, Caustics and Wave Fronts (Modern Birkhäuser Classics):

Singularity theory is a far reaching extension of maxima and minima investigations of differentiable functions with implications for many different areas of mathematics engineering catastrophe theory and the theory of bifurcations and science The three parts of this first volume of a two volume set deal with the stability problem for smooth mappings critical points of smooth functions and caustics and wave front singularities The second volume From the Back Cover Originally published in the 1980s Singularities of Differentiable Maps The Classification of Critical Points Caustics and Wave Fronts was the first of two volumes that together formed a translat
