bibliothèque de lihes porte le nom du deuxième directeur afin de rendre hommage Compactifications of Symmetric Spaces (Progress in Mathematics):

The concept of symmetric space is of central importance in many branches of mathematics Compactifications of these spaces have been studied from the points of view of representation theory geometry and random walks This work is devoted to the study of the interrelationships among these various compactifications and in particular focuses on the martin compactifications It is the first exposition to treat compactifications of symmetric spaces systematically and t
