mathematics calendar international journal of engineering research and applications ijera is an open access online peer reviewed international journal that publishes research Ricci Flow and the Sphere Theorem (Graduate Studies in Mathematics):

In 1982 R Hamilton introduced a nonlinear evolution equation for Riemannian metrics with the aim of finding canonical metrics on manifolds This evolution equation is known as the Ricci flow and it has since been used widely and with great success most notably in Perelman s solution of the Poincar eacute conjecture Furthermore various convergence theorems have been established This book provides a concise introduction to the subject as well as a comprehensive acc This book is a great self contained presentation of one of the most important and exciting developments in differential geometry It is highly recommended for both researchers and students interested in differential geometry topology and Ricci flow As the ma
