**By Alberto Candel and Lawrence Conlon: Foliations I (Graduate Studies in Mathematics)** abstract this book is about differentiation of functions it is divided into two parts which can be used as different textbooks one for an advanced undergraduate hb 350pp 2008 atfomenko and asmishchenko moscow state university russia this volume is

intended for graduate and research students in mathematics and Foliations I (Graduate Studies in Mathematics):

This is the first of two volumes on the qualitative theory of foliations This volume is divided into three parts It is extensively illustrated throughout and provides a large number of examples Part 1 is intended as a primer in foliation theory A working knowledge of manifold theory and topology is a prerequisite Fundamental definitions and theorems are explained to prepare the reader for further exploration of the topic This section places considerable emphasis Both volumes are written with great care and a deep knowledge of the subject provide the most extensive elaboration of several aspects of foliation theory Mathematical s The large number of well chosen examples is one of the most strik
