By Mikio Furuta : Index Theorem. 1 (Translations of Mathematical Monographs) our mission is to further the interests of mathematical research scholarship and education mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics it bears close connections to metamathematics the Index Theorem. 1 (Translations of Mathematical Monographs):

The Atiyah Singer index theorem is a remarkable result that allows one to compute the space of solutions of a linear elliptic partial differential operator on a manifold in terms of purely topological data related to the manifold and the symbol of the operator First proved by Atiyah and Singer in 1963 it marked the beginning of a completely new direction of research in mathematics with relations to differential geometry partial differential equations differential top The book is well organized The strategy of the proof and applications are clearly laid out this monograph is an important contribution to the subject Mathematical s
