school on mirror symmetry held at Winter School on Mirror Symmetry, Vector Bundles and Lagrangian Submanifolds:

The collection of articles in this volume are based on lectures presented during the Winter School on Mirror Symmetry held at Harvard University. There are many new directions suggested by mirror symmetry which could potentially have very rich connections in physics and mathematics. This book brings together the latest research in a major area of mathematical physics including the recent progress in mirror manifolds and Lagrangian submanifolds. In particular several ar
