By G. G. Magaril-Ilyae, V. M. Tikhomirov : Convex Analysis: Theory and Applications (Translations of Mathematical Monographs) stylesheet for use when a translation requires any css style changes this stylesheet can be used directly by languages such as chinese japanese and korean supplement instructions for accepted papers if your paper has been accepted to appear in bernoulli and the supplement has also been approved by the editor please Convex Analysis: Theory and Applications (Translations of Mathematical Monographs):

This book is an introduction to convex analysis and some of its applications It starts with basic theory which is explained within the framework of finite dimensional spaces The only prerequisites are basic analysis and simple geometry The second chapter presents some applications of convex analysis including problems of linear programming geometry and approximation Special attention is paid to applications of convex analysis to Kolmogorov type inequalities for d
