By M. Lübke and A. Teleman : The Universal Kobayashi-hitchin Correspondence on Hermitian Manifolds (Memoirs of the American Mathematical Society)

The Universal Kobayashi-hitchin Correspondence on Hermitian Manifolds (Memoirs of the American Mathematical Society):

0 of 0 review helpful Fundamental mathematics By Mayfair Dear sirsMathematics are fundamental to better comprehende science and to divulge and state our arguments of a scientific base and it is also of great importance in a cientist s work this book has a elegant mathematical device a formal mathematical style and it is a proof of how mathematics are fundamental geometry has a central role in physics tensor v We prove a very general Kobayashi Hitchin correspondence on arbitrary compact Hermitian manifolds and we discuss differential geometric properties of the corresponding moduli spaces This correspondence refers to moduli spaces of universal holomorphic oriented pairs Most of the classical moduli problems in complex geometry e g holomorphic bundles with reductive structure groups holomorphic pairs holomorphic Higgs pairs Witten triples arbitrary quiver moduli pr
