By Ross Leadbetter, Stamatis Cambanis, Vladas Pipiras : A Basic Course in Measure and Probability: Theory for Applications

the purpose of this page is to provide resources in the rapidly growing area of computer based statistical data analysis this site provides a web enhanced course on A Basic Course in Measure and Probability: Theory for Applications:

Originating from the authors own graduate course at the University of North Carolina this material has been thoroughly tried and tested over many years making the book perfect for a two term course or for self study It provides a concise introduction that covers all of the measure theory and probability most useful for statisticians including Lebesgue integration limit theorems in probability martingales and some theory of stochastic processes Readers can test t About the Author Ross Leadbetter is Professor of Statistics and Operations Research at the University of North Carolina Chapel Hill His research involves stochastic process theory and applications point processes and particularly extreme value and risk theor
