By Marcel Berger, Bernard Gostiaux : Differential Geometry: Manifolds, Curves, and Surfaces (Graduate Texts in Mathematics)

abstract this book is about differentiation of functions it is divided into two parts which can be used as different textbooks one for an advanced undergraduate a list of number theory books the number theory web which houses this web page contains links to pre 1996 books Differential Geometry: Manifolds, Curves, and Surfaces (Graduate Texts in Mathematics):

This book consists of two parts different in form but similar in spirit The first which comprises chapters 0 through 9 is a revised and somewhat enlarged version of the 1972 book Geometrie Differentielle The second part chapters 10 and 11 is an attempt to remedy the notorious absence in the original book of any treatment of surfaces in three space an omission all the more unforgivable in that surfaces are some of the most common geometrical objects not only in m
