By Mark Green, Phillip Griffiths, Matt Kerr : Hodge Theory, Complex Geometry, and Representation Theory (Regional Conference Series in Mathematics) time geography or time space geography is an evolving transdisciplinary perspective on spatial and temporal processes and events such as social interaction introduction to

education grassie w 2008 entangled narratives competing visions of the good life rev the sri lanka journal of the humanities xxxiv 1and2 Hodge Theory, Complex Geometry, and Representation Theory (Regional Conference Series in Mathematics):

This monograph presents topics in Hodge theory and representation theory two of the most active and important areas in contemporary mathematics The underlying theme is the use of complex geometry to understand the two subjects and their relationships to one another an approach that is complementary to what is in the literature Finite dimensional representation theory and complex geometry enter via the concept of Hodge representations and Hodge domains Infinite dimen About the Author Mark Green University of California Los Angeles CA USA Phillip Griffiths Institute of Advanced Study Princeton NJ USA Matt Kerr Washington University St Louis MO USA
