By Jose Labastida, Marcos Marino : Topological Quantum Field Theory and Four Manifolds (Mathematical Physics Studies)

electives in addition to specified course work the physics major requires three electives these electives may be selected from the following courses the miracle of the appropriateness of the language of mathematics for the formulation of the laws of physics is a wonderful gift which we neither understand nor deserve Topological Quantum Field Theory and Four Manifolds (Mathematical Physics Studies):

The emergence of topological quantum eld theory has been one of the most important breakthroughs which have occurred in the context of ma ematical physics in the last century a century characterizedbyindependent developments of the main ideas in both disciplines physics and mathematics which has concluded with two decades of strong interaction between them where physics as in previous centuries has acted as a source of new mat matics Topological quantum eld th From the reviews of the first edition The present book hellip starts with a survey of important topological topics then reviews the theories of Donaldson and Seiberg Witten and describes various aspects of supersymmetery hellip Graduate students
