A great deal of progress has been made recently in the field of asymptotic formulas that arise in the theory of Dirac and Laplace type operators Asymptotic Formulae in Spectral Geometry collects these results and computations into one book Written by a leading pioneer in the field it focuses on the functorial and special cases methods of computing asymptotic heat trace and heat content coefficients in the heat equation It incorporates the work of many authors into th This book gathers the available knowledge on the subject it has a comprehensive bibliography and is an excellent complement to Gilkey s Invariance theory the heat equation and the Atiyah Singer index theorem Second Edition Mathematical s Issue 2005
