By Miguel Brozos Vazquez, Peter B. Gilkey, Stana Nikcevic : Geometric Realizations of Curvature (ICP Advanced Texts in Mathematics) buy geometric realizations of curvature icp advanced texts in mathematics 6 from

whsmith today geometric realizations of curvature properties of the riemann curvature tensor and the underlying geometric icp advanced texts in mathematics Geometric Realizations of Curvature (ICP Advanced Texts in Mathematics):

1 of 1 review helpful Fantastic Book By Ekaterina Puffini This is a must buy for anyone interested in differential geometry and curvature theory The three authors obviously know their stuff Not for the average casual reader I would recommend having taken a first year graduate course in differential geometry before buying it But apart from that highly recommended A central area of study in Differential Geometry is the examination of the relationship between the purely algebraic properties of the Riemann curvature tensor and the underlying geometric properties of the manifold In this book the findings of numerous investigations in this field of study are reviewed and presented in a clear coherent form including the latest developments and proofs Even though many authors have worked in this area in recent years many fundament From the Inside Flap A central area of study in Differential Geometry is the examination of the relationship between the purely algebraic properties of the Riemann curvature tensor and the underlying geometric properties of the manifold In this book the findin
