By Peter B. Gilkey : The Geometry of Curvature Homogeneous Pseudo-riemannian Manifolds (ICP Advanced Texts in Mathematics) The Geometry of Curvature Homogeneous Pseudo-riemannian Manifolds (ICP Advanced

Texts in Mathematics):

Pseudo Riemannian geometry is an active research field not only in differential geometry but also in mathematical physics where the higher signature geometries play a role in brane theory An essential reference tool for research mathematicians and physicists this book also serves as a useful introduction to students entering this active and rapidly growing field The author presents a comprehensive treatment of several aspects of pseudo Riemannian geometry including t
