By Roy Williams : Geometry of Navigation (Horwood Series in Mathematics & Applications) Geometry of Navigation (Horwood Series in Mathematics & Applications):

Many problems in navigation which because of the true shape of the Earth seemed numerically and algebraically impractical can now be resolved by computers Nevertheless traditional methods provide important back up for which

geometry is invaluable This book offers a treatment of the Earth as an ellipsoid of revolution pictured as a sphere as has served navigators for centuries and applies to surface navigation and also to the surfaces of planets It also inc Roy Williams hellip has met this challenge with considerable success in this well produced and clearly presented book Journal of Navigation
