By Yuan-Jen Chiang : Developments of Harmonic Maps, Wave Maps and Yang-Mills Fields into Biharmonic Maps, Biwave Maps and Bi-Yang-Mills Fields (Frontiers in Mathematics)

Developments of Harmonic Maps, Wave Maps and Yang-Mills Fields into Biharmonic Maps, Biwave Maps and Bi-Yang-Mills Fields (Frontiers in Mathematics):

Harmonic maps between Riemannian manifolds were first established by James Eells and Joseph H Sampson in 1964 Wave maps are harmonic maps on Minkowski spaces and have been studied since the 1990s Yang Mills fields the critical points of Yang Mills functionals of connections whose curvature tensors are harmonic were explored by a few physicists in the 1950s and biharmonic maps generalizing harmonic maps were introduced by Guoying Jiang in 1986 The book presents a From the book reviews ldquo The monograph under review gathers developments in the theory of harmonic maps wave maps and Yang Mills fields and their generalisations to biharmonic maps biwave maps and bi Yang Mills fields hellip The present book is a
