By Wilderich Tuschmann, David J. Wraith : Moduli Spaces of Riemannian Metrics (Oberwolfach Seminars)
Moduli Spaces of Riemannian Metrics (Oberwolfach Seminars):

This book studies certain spaces of Riemannian metrics on both compact and non compact manifolds These spaces are defined by various sign based curvature conditions with special attention paid to positive scalar curvature and non

negative sectional curvature though we also consider positive Ricci and non positive sectional curvature If we form the quotient of such a space of metrics under the action of the diffeomorphism group or possibly a subgroup we obtain a mod ldquo This book serves as a comprehensive yet succinct and accessible guide to the topology of spaces of Riemannian metrics with a given curvature sign condition hellip This is one of the most well studied aspects of moduli spaces of Riemannian metrics
