By Christian Bär, Christian Becker : Differential Characters (Lecture Notes in Mathematics) wamap is a web based mathematics assessment and course management platform its use is provided free to washington state public educational institution students and online homework and grading tools for instructors and students that reinforce

student learning through practice and instant feedback Differential Characters (Lecture Notes in Mathematics):

Providing a systematic introduction to differential characters as introduced by Cheeger and Simons this text describes important concepts such as fiber integration higher dimensional holonomy transgression and the product structure in a geometric manner Differential characters form a model of what is nowadays called differential cohomology which is the mathematical structure behind the higher gauge theories in physics nbsp From the Back Cover Providing a systematic introduction to differential characters as introduced by Cheeger and Simons this text describes important concepts such as fiber integration higher dimensional holonomy transgression and the product structure in a
