By Daniele Angella : Cohomological Aspects in Complex Non-Kähler Geometry (Lecture Notes in Mathematics)

Cohomological Aspects in Complex Non-Kähler Geometry (Lecture Notes in Mathematics):

In these notes we provide a summary of recent results on the cohomological properties of compact complex manifolds not endowed with a K auml hler structure On the one hand the large number of developed analytic techniques makes it possible to prove strong cohomological properties for compact K auml hler manifolds On the other in order to further investigate any of these properties it is natural to look for manifolds that do not have any K auml hler structu From the Back Cover In these notes we provide a summary of recent nbsp results on the cohomological properties of compact complex manifolds not endowed with a K auml hler structure On the one hand the large number of developed analytic techniques makes it po
