By William Kirk, Naseer Shahzad : Fixed Point Theory in Distance Spaces the online version of computers and mathematics with applications at sciencedirect the worlds leading platform for high quality peer reviewed full text journals this disambiguation page lists articles associated with the title euclidean if an internal link led you here you may wish to change the link to point directly to Fixed Point Theory in Distance Spaces:

This is a monograph on fixed point theory covering the purely metric aspects of the theory ndash particularly results that do not depend on any algebraic structure of the underlying space Traditionally a large body of metric fixed point theory has been couched in a functional analytic framework This aspect of the theory has been written about extensively There are four classical fixed point theorems against which metric extensions are usually checked These are res ldquo The authors of this interesting monograph are concerned with purely metric aspects of fixed point theory hellip this book can serve not only as a timely introduction to metric fixed point theory but also as a catalyst for further research in this f
