By Emil Prodan, Hermann Schulz-Baldes: Bulk and Boundary Invariants for Complex Topological Insulators: From K-Theory to Physics (Mathematical Physics Studies) list of the new elected members to the european

academy of sciences the universe cosmos galaxies space black holes earth planets moon stars sun solar system Bulk and Boundary Invariants for Complex Topological Insulators: From K-Theory to Physics (Mathematical Physics Studies):

This monograph offers an overview of rigorous results on fermionic topological insulators from the complex classes namely those without symmetries or with just a chiral symmetry Particular focus is on the stability of the topological invariants in the presence of strong disorder on the interplay between the bulk and boundary invariants and on their dependence on magnetic fields The first part presents motivating examples and the conjectures put forward by t From the Back Cover This monograph offers an overview of rigorous results on fermionic topological insulators from the complex classes namely those without symmetries or with just a chiral symmetry Particular focus is on the stability of the topological
