By Cristian E. Gutiérrez : The Monge-Ampère Equation (Progress in Nonlinear Differential Equations and Their Applications) this paper considers the problem of designing maximum distance separable mds codes over small fields with constraints on the support of their generator matrices retrouvez toutes les discothque marseille et se retrouver dans les plus grandes soires en discothque marseille The Monge-Ampère Equation (Progress in Nonlinear Differential Equations and Their Applications):

Now in its second edition this monograph explores the Monge Amp egrave re equation and the latest advances in its study and applications nbsp It provides an essentially self contained systematic exposition of the theory of weak solutions including regularity results by L A Caffarelli nbsp The geometric aspects of this theory are stressed using techniques from harmonic analysis such as covering lemmas and set decompositions nbsp An effort is made to present ldquo Very clear monograph that will be useful in stimulating new researches on the Monge Amp egrave re equation its connections with several research areas and its applications rdquo Vincenzo Vespri zbMATH 1356 35004 2017
