By W. Klingenberg : Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften)

Lectures on Closed Geodesics (Grundlehren der mathematischen Wissenschaften):

0 of 0 review helpful Five Stars By Customer Better than I have imagined Thank you The question of existence of closed geodesics on a Riemannian manifold and the properties of the corresponding periodic orbits in the geodesic flow has been the object of intensive investigations since the beginning of global differential geometry during the last century The simplest case occurs for closed surfaces of negative curvature Here the fundamental group is very large and as shown by Hadamard Had in 1898 every non null homotopic closed curve can be
