**By Hanno Rund : The Differential Geometry of Finsler Spaces (Grundlehren der mathematischen Wissenschaften)** The Differential Geometry of Finsler Spaces (Grundlehren der mathematischen Wissenschaften):

The present monograph is motivated by two distinct aims Firstly an endeavour has been made to furnish a reasonably comprehensive account of the theory of Finsler spaces based on the methods of classical differential geometry Secondly it is hoped that this monograph may serve also as an introduction to a branch of differential geometry which is closely related to various topics in theoretical physics notably analytical dynamics and geometrical optics With this secon
