From Kirillov A a Soucek Vladimir : Representation Theory and Noncommutative Harmonic Analysis I: Fundamental Concepts. Representations of Virasoro and Affine Algebras (Encyclopaedia of Mathematical Sciences) (v. 1) Representation Theory and Noncommutative Harmonic Analysis I: Fundamental Concepts. Representations of Virasoro and Affine Algebras (Encyclopaedia of Mathematical Sciences) (v. 1):

This two part survey provides a short review of the classical part of representation theory carefully exposing the structure of the theory without overwhelming readers with details and deals with representations of Virasoro and Kac Moody algebra It presents a wealth of recent results on representations of infinite dimensional groups
