By Jean-Pierre Serre : Trees (Springer Monographs in Mathematics) in mathematics the axiom of choice or ac is an axiom of set theory equivalent to the statement that the cartesian product of a collection of non empty sets is non list of the new elected members to the european academy of sciences Trees (Springer Monographs in Mathematics):

The seminal ideas of this book played a key role in the development of group theory since the 70s Several generations of mathematicians learned geometric ideas in group theory from this book In it the author proves the fundamental theorem for the special cases of free groups and tree products before dealing with the proof of the general case This new edition is ideal for graduate students and researchers in algebra geometry and topology
