In 1982 Claude Chevalley expressed three specific wishes with respect to the publication of his Works First he stated very clearly that such a publication should include his non shy technical papers His reasons for that were two fold One reason was his life shy long commitment to epistemology and to politics which made him strongly opposed to the view otherwise currently held that mathematics involves only half of a man As he wrote to G C Rota on November 29th From the Back Cover This volume is Vol 2 of a projected series devoted to the mathematical and philosophical works of the late Claude Chevalley It covers the main contributions by the author to the theory of spinors Since its appearance in 1954 The Algebrai
