faculty of arts and science that serves as a Topics in Nevanlinna Theory (Lecture Notes in Mathematics):

These are notes of lectures on Nevanlinna theory in the classical case of meromorphic functions and the generalization by Carlson Griffith to equidimensional holomorphic maps using as domain space finite coverings of \mathbb{C} resp \mathbb{C}^n . Conjecturally best possible error terms are obtained following a method of Ahlfors and Wong. This is especially significant when obtaining uniformity for the error term w.r.t. coverings since the analytic yields case a st
