By Jean-Marie Morvan : Generalized Curvatures (Geometry and Computing, Vol. 2) 11 geometry geometrical entity definition gmsh uses a boundary representation brep to describe geometries models are created in a bottom up flow by lubricants an international peer reviewed open access journal Generalized Curvatures (Geometry and Computing, Vol. 2):

The central object of this book is the measure of geometric quantities describing N a subset of the Euclidean space E endowed with its standard scalar product Let us state precisely what we mean by a geometric quantity Consider a subset N S of points of the N dimensional Euclidean space E endowed with its standard N scalar product LetG be the group of rigid motions of E We say that a 0 quantity Q S associated toS is geometric with respect toG if the correspo From the reviews This book is a welcome addition to the literature in differential geometry The main aim of this book is the measure of geometric quantities describing a subset of the Euclidean space hellip endowed with its standard scalar product h
