By Friedrich Hirzebruch, Thomas Berger, Rainer Jung : Manifolds and Modular Forms, Vol. E20 (Aspects of Mathematics) Manifolds and Modular Forms, Vol. E20 (Aspects of Mathematics):

During the winter term 1987 88 I gave a course at the University of Bonn under the title Manifolds and Modular Forms Iwanted to develop the theory of Elliptic Genera and to learn it myself on this occasion This theory due to Ochanine Landweber Stong and others was relatively new at the time The word genus is meant in the sense of my book Neue Topologische Methoden in der Algebraischen Geometrie published in 1956 A genus is a homomorphism of the Thom cobordis
