By Rafael López: Constant Mean Curvature Surfaces with Boundary (Springer Monographs in Mathematics) international journal of engineering research and applications ijera is an open access online peer reviewed international journal that publishes research this article may be too long to read and navigate comfortably please consider splitting

content into sub articles condensing it or adding or removing subheadings Constant Mean Curvature Surfaces with Boundary (Springer Monographs in Mathematics):

The study of surfaces with constant mean curvature CMC is one of the main topics in classical differential geometry Moreover CMC surfaces are important mathematical models for the physics of interfaces in the absence of gravity where they separate two different media or for capillary phenomena Further as most techniques used in the theory of CMC surfaces not only involve geometric methods but also PDE and complex analysis the theory is also of great interest f
