By Eleonora Catsigeras : Differential Geometry and Electromagnetism learn differential equations for free differential equations separable equations exact equations integrating factors and homogeneous equations and more mathematics undergraduate program graduate program faculty all courses faculty listings and curricular and degree requirements described herein are Differential Geometry and Electromagnetism:

These lecture notes correspond to a short course on Mathematics focusing on the differential geometry of compact manifolds the exterior Clifford algebra of differential forms and their applications to the classical and relativist theories of electromagnetism in Physics It is assumed that the reader already knows the definitions and techniques of the exterior calculus and the integration theorems of differential forms on manifolds and submanifolds of euclidean spaces About the Author Eleonora Catsigeras has born in Montevideo Uruguay in 1956 She is PhD in Mathematics and Professor at the Universidad de la Rep uacute blica Uruguay Her area of research is the mathematical theory of Dynamical Systems and its application
