In this volume are collected notes of lectures delivered at the First In shy ternational Research Institute of the

Mathematical Society of Japan This conference held at Tohoku University in July 1993 was devoted to geometry and global analysis Subsequent to the conference in answer to popular de shy mand from the participants it was decided to publish the notes of the survey lectures Written by the lecturers themselves all experts in their respective fields th From the Back Cover The field of geometric variational problems that is nonlinear problems arising in geometry and topology from the point of view of global analysis has developed very rapidly in the last decade It was therefore felt timely to produce a set
