By Ivar Ekeland : Exterior differential calculus and applications to economic theory (Publications of the Scuola Normale Superiore) Exterior differential calculus and applications to economic theory (Publications of the Scuola Normale Superiore):

During the academic year 1995 96 I was invited by the Scuola Normale Superiore to give a series of lectures The purpose of these notes is to make the underlying economic problems and the mathematical theory of exterior differential systems accessible to a larger number of people It is the purpose of these notes to go over these results at a more leisurely pace keeping in mind that mathematicians are not familiar with economic theory and that very few people have read
