0 of 0 review helpful High price with nothing much to offer By Roger Bagula What would Dr Seifert say about this book Or William Thurston For the American school of topologyto get the recognition in the world that is deserved something better thatgroups of documents like these is needed If you are honoring someone they should probably deserve being honored by having done somethingthat has wide Recent success with the four dimensional Poincare conjecture has revived interest in low dimensional topology especially the three dimensional Poincare conjecture and other aspects of the problems of classifying three dimensional manifolds These problems have a driving force and have generated a great body of research as well as insight The main topics treated in this book include a paper by V

Poenaru on the Poincare conjecture and its ramifications giving an ins
