From World Scientific Publishing Company : Geometry, Analysis and Applications scope and indexing bjga is an international bi annual journal bjga covers a wide spectrum of research papers in differential geometry and all its interdisciplinary algebraic geometry is a branch of mathematics classically studying zeros of multivariate polynomials modern algebraic geometry is based on the use of abstract Geometry, Analysis and Applications:

Geometrical concepts play a significant role in the analysis of physical systems Apart from the intrinsic interest the knowledge of differentiable manifolds has become useful even mandatory in an ever increasing number of areas of mathematics and its applications Many results concepts in analysis find their most natural generalized setting in manifold theory An interrelation of geometry and analysis can be found in this volume The book presents original researc
