spacetime structures of quantum particles authors vu b ho comments 18 pages in this work we propose a covariant formulation for the gravitational field and derive various number theorists home pagesdepartmental listings complete listing a b c d e f g q q a href=quot;listhtmlhquot;gt;h i j k l m Quaternionic Structures in Mathematics and Physics - Proceedings of the Second Meeting:

During the last five years after the first meeting on ldquo Quaternionic Structures in Mathematics and Physics rdquo interest in quaternionic geometry and its applications has continued to increase Progress has been made in constructing new classes of manifolds with quaternionic structures quaternionic K auml hler hyper K auml hler hyper complex etc studying the differential geometry of special classes of such manifolds and their submanifolds understanding r
