By Oldrich Kowalski, Eric Boeckx, Lieven Vanhecke : Riemannian Manifolds of Conullity Two Riemannian Manifolds of Conullity Two:

This book deals with Riemannian manifolds for which the nullity space of the curvature tensor has codimension two. These manifolds are "semi symmetric spaces foliated by Euclidean leaves of codimension two" in the sense of Z. I. Szabó. The authors concentrate on the rich geometrical structure and explicit descriptions of these

remarkable spaces Also parallel theories are developed for manifolds of "relative conullity two" This makes a bridg
