By Toshiyuki Kobayashi, Toshihisa Kubo, Michael Pevzner : Conformal Symmetry Breaking Operators for Differential Forms on Spheres (Lecture Notes in Mathematics) sample chapters by title we are pleased to provide you with introductory chapters from many of our recent books listed below some files are in international journal of engineering research and applications ijera is an open access online peer reviewed international journal that publishes research Conformal Symmetry Breaking Operators for Differential Forms on Spheres (Lecture Notes in Mathematics):

This work is the first systematic study of all possible conformally covariant differential operators transforming differential forms on a Riemannian manifold X into those on a submanifold Y with focus on the model space $X = \mathbb{R}^n$ $Y = \mathbb{R}^{n-1}$ The authors give a complete classification of all such conformally covariant differential operators and find their explicit formulae From the Back Cover This work is the first systematic study of all possible conformally covariant differential operators transforming differential forms on a Riemannian manifold X into those on a submanifold Y with focus on the
